

Year 3
(Term 5 - Week 3)

Session 2 — Can you explain it?
Subtract 3-digit numbers from 3-digit numbers (no regrouping)

Ollies thinks that:

$$947 - 426 = 323$$

Because.....

$$9 - 6 = 3$$

$$4 - 2 = 2$$

$$7 - 4 = 3$$

Why is he incorrect?

.....

.....

.....

.....

.....

Session 2 – Can you apply it ?
Subtract 3-digit numbers from 3-digit numbers (no regrouping)

A, B, C, D, E and F are digits.

$$\mathbf{ABC - DEF = 123}$$

Solve the problem in several ways if all the digits are different.
